Technical Skills

Languages: Python, Kotlin, Rust, Java, C, JavaScript, PHP
Frameworks: FastAPI, Spring Boot, React, Next.js, SvelteKit
Tools/Infrastructure: Docker, Linux, Git, SQL, Vercel
ML/Computer Vision: YOLOv8, Model Fine-Tuning, Inference Pipelines

Projects/Engineering Experience

MedBud - AI-Powered Medication Adherence Assistant **https://github.com/LongTTruong/MedBud**

- Built a full-stack SMS/WhatsApp medication adherence platform for older adults using FastAPI, PostgreSQL, SvelteKit, and Twilio, enabling low-bandwidth patient engagement without requiring a mobile app.
- Developed an LLM-assisted inbound messaging pipeline with local Qwen2.5 7B inference via llama.cpp, performing structured intent classification, bilingual English/Spanish language detection, symptom triage, and safe keyword-based fallback.
- Designed and shipped multiple operational dashboards, including a staff dashboard, patient transcript view, caregiver dashboard, and refill management queue, supporting real-time adherence monitoring and intervention workflows.

M3 - Urban Blight Detection Platform **https://github.com/LongTTruong/M3Server**

HackMemphis 2025

- Built a computer vision pipeline to analyze Google Street View imagery to detect instances of urban blight.
- Fine-tuned a **YOLOv8 object detection model** and validated detection accuracy across custom datasets.
- Developed **FastAPI** backend API to ingest detection results and serve data to visualization dashboards.
- Implemented automated data pipeline to crawl street imagery within specified date ranges.

Innovate Memphis Website Refactor

GiveCamp 2026

- Led redesign and architectural cleanup of a legacy WordPress site with excessive plugin dependencies.
- Simplified CMS architecture by migrating functionality into Divi-based components and custom PHP/CSS.
- Reduced backend complexity and improved maintainability by eliminating redundant WordPress plugins.
- Coordinated with a volunteer development team and non-technical stakeholders to deliver a redesigned site.

CocoNails Business Website

Freelance Web Development

- Designed and deployed full-stack business website using Next.js, TailwindCSS, and Vercel.
- Implemented responsive UI and SEO-optimized structure for local search visibility.
- Generated ~500 user interactions from zero for a small-town business.

Professional Experience

Electronics Technician

FedEx (Contract via Abacus) *Oct 2025 – Present*

- Diagnose and repair hardware and software issues on Zebra RS6000 and WT6000 enterprise devices.
- Configure Zebra WS501 Wearable Computers according to client specifications.
- Documented diagnostics, repair actions, and inventory/status changes in RMS, supporting accurate tracking and operational reporting.
- Support on-site supply chain analyst with device configuration and data management tasks.

Undergraduate Research Assistant

SMART BME Lab – University of Tennessee - Knoxville *Nov 2023 – May 2024*

- Developed Android applications for SoftBank Pepper robots using the QiSDK.
- Reduced median API response times by ~3 seconds by redesigning speech recognition pipeline.
- Improved application performance through multithreading, increasing responsiveness of concurrent tasks.
- Managed Git workflows and maintained repository integrity for collaborative development.

Nurse Technician

University of Tennessee Medical Center - Knoxville *Aug 2021 – Jan 2022*

- Provided direct patient care for up to 30 patients per shift in a high-acuity hospital environment.
- Assisted clinical staff during emergency situations including code responses and patient stabilization.

Education

University of Tennessee - Knoxville *August 2019 - May 2024*

Coursework towards B.A. - Linguistics and B.S. Neuroscience
